

# Syneos Health<sup>®</sup> CNS

Extensive experience to meet your toughest development challenges from lab to life.

## Global Scale and Reach

Working in partnership with the most innovative companies in the world, Syneos Health brings business insight to science and scientific rigor to business through our unique biopharmaceutical acceleration model (BAM). With an unparalleled suite of integrated solutions combining one of the most respected global clinical research organizations (CROs) with a global contract commercial organization (CCO), we help our customers improve performance, reduce risk and speed much-needed therapies to patients worldwide.

## Dedicated Global CNS Team

We have nearly 1,600 dedicated CNS staff globally, including representation in North America, Latin America, Europe and the Asia-Pacific region. Our customer relations executives (CREs) are unique to Syneos Health and within the industry. These therapeutic experts are also operational professionals and provide

strategic input, tactical oversight, and strong linkage between physicians (who understand patients and diseases) and sponsors (who have developed new treatments). Our CREs are dedicated to the customer and have a passion and expertise for the science, but also serve as the primary point for delivery accountability.

### Advanced Credentials

- Clinicians
- Scientists
- Drug developers

### Leadership in Pharma

- Leading teams in developing CNS drugs
- Strategic role

### Leadership in CRO

- Significant responsibilities for major programs

### Hands-On Trial Experience

- PI for trials
- Served on IRBs
- Has managed all trial aspects

Accountable Leadership | Responsive Teams | Actionable Data

## Our Experience (recent 5 years)

Our CNS study experience is broad, with expertise spanning several therapeutic areas including analgesia, neurology and psychiatry:

- 350+ studies
- 18,000+ sites
- 109,000+ patients

## WE BRING CONSISTENT THERAPEUTIC EXPERTISE TO YOUR CLINICAL DEVELOPMENT PROGRAM

**TRIALS:**  
**350+**

Analgesia: 75  
Neurology: 170  
Psychiatry: 110

**PATIENTS:**  
**109,000+**

Analgesia: 27,000+  
Neurology: 33,000+  
Psychiatry: 48,300+

**SITES:**  
**18,000+**

Analgesia: 5,100+  
Neurology: 7,300+  
Psychiatry: 5,500+

In the past five years, we have helped to develop or commercialize:

Approved by the FDA

Approved by the EMA

## Clinical Surveillance (CST) and Rater Training: Minimizing Risks and Failed Trials

Our CST team applies medical and scientific expertise to ensure trials are executed with qualified patients, standardized raters, reliable data, continuous training, engaged sites and actionable readouts. From pre-baseline eligibility review to helping design well-written protocols, we cover every aspect of trial management to ensure quality eligibility reviews.

We have successfully conducted CST Eligibility Reviews for **150+ trials**, across **45+ indications**, in **50 countries** reviewing over **40,000+ subjects**.

## Our Process

We represent the art and science of CNS trials married to the discipline of our Trusted Process®. Our vision, organization, commitment and investment in CNS is supported by our proprietary, metrics-driven methodology designed to manage all aspects of your clinical studies to deliver faster results while maintaining data integrity and reducing operational risk and variability. This proven four-step process of plan activation, quick start, program accelerate and quality finish has helped us to build and refine our successful approach to clinical development in CNS.

## Task Forces Built for Specialization

Staffed by a cross-functional team of leading neurology, psychiatry, ophthalmology, and analgesia medical and clinical experts, we have developed task forces to provide deep insight into pediatrics, biosimilars, rare/orphan diseases, and real world evidence to guide successful development and execution of your trials while proactively addressing any potential issues that could put your timeline at risk.
